MEL'S TESTIMONIAL

"My new RGK Sprint looks and feels great. It has been exciting to create a made to measure frame and work on finding a more efficient position for me! My frame feels really stiff and secure, so I feel much more powerful when I race."

DAVE'S TESTIMONIAL

“RGK has designed the ultimate club racing wheelchair to support athletes starting our great sport right through to competing professionally. The made to measure frame makes it suitable for everyone and ensures you can be as efficient and ‘aero’ as possible to achieve great results. The Sprint is available with lots of different options to fine tune the set up, and being lightweight and really stiff means more energy is delivered to the track, and road. This is what the sport needs and I’m looking forward to seeing young talented racers develop their performances in the Sprint.”

Dave Weir
6X PARALYMPIC GOLD MEDALIST
